

How to make (Fake) Tables in Scribus

The How to make these tables video is found here:

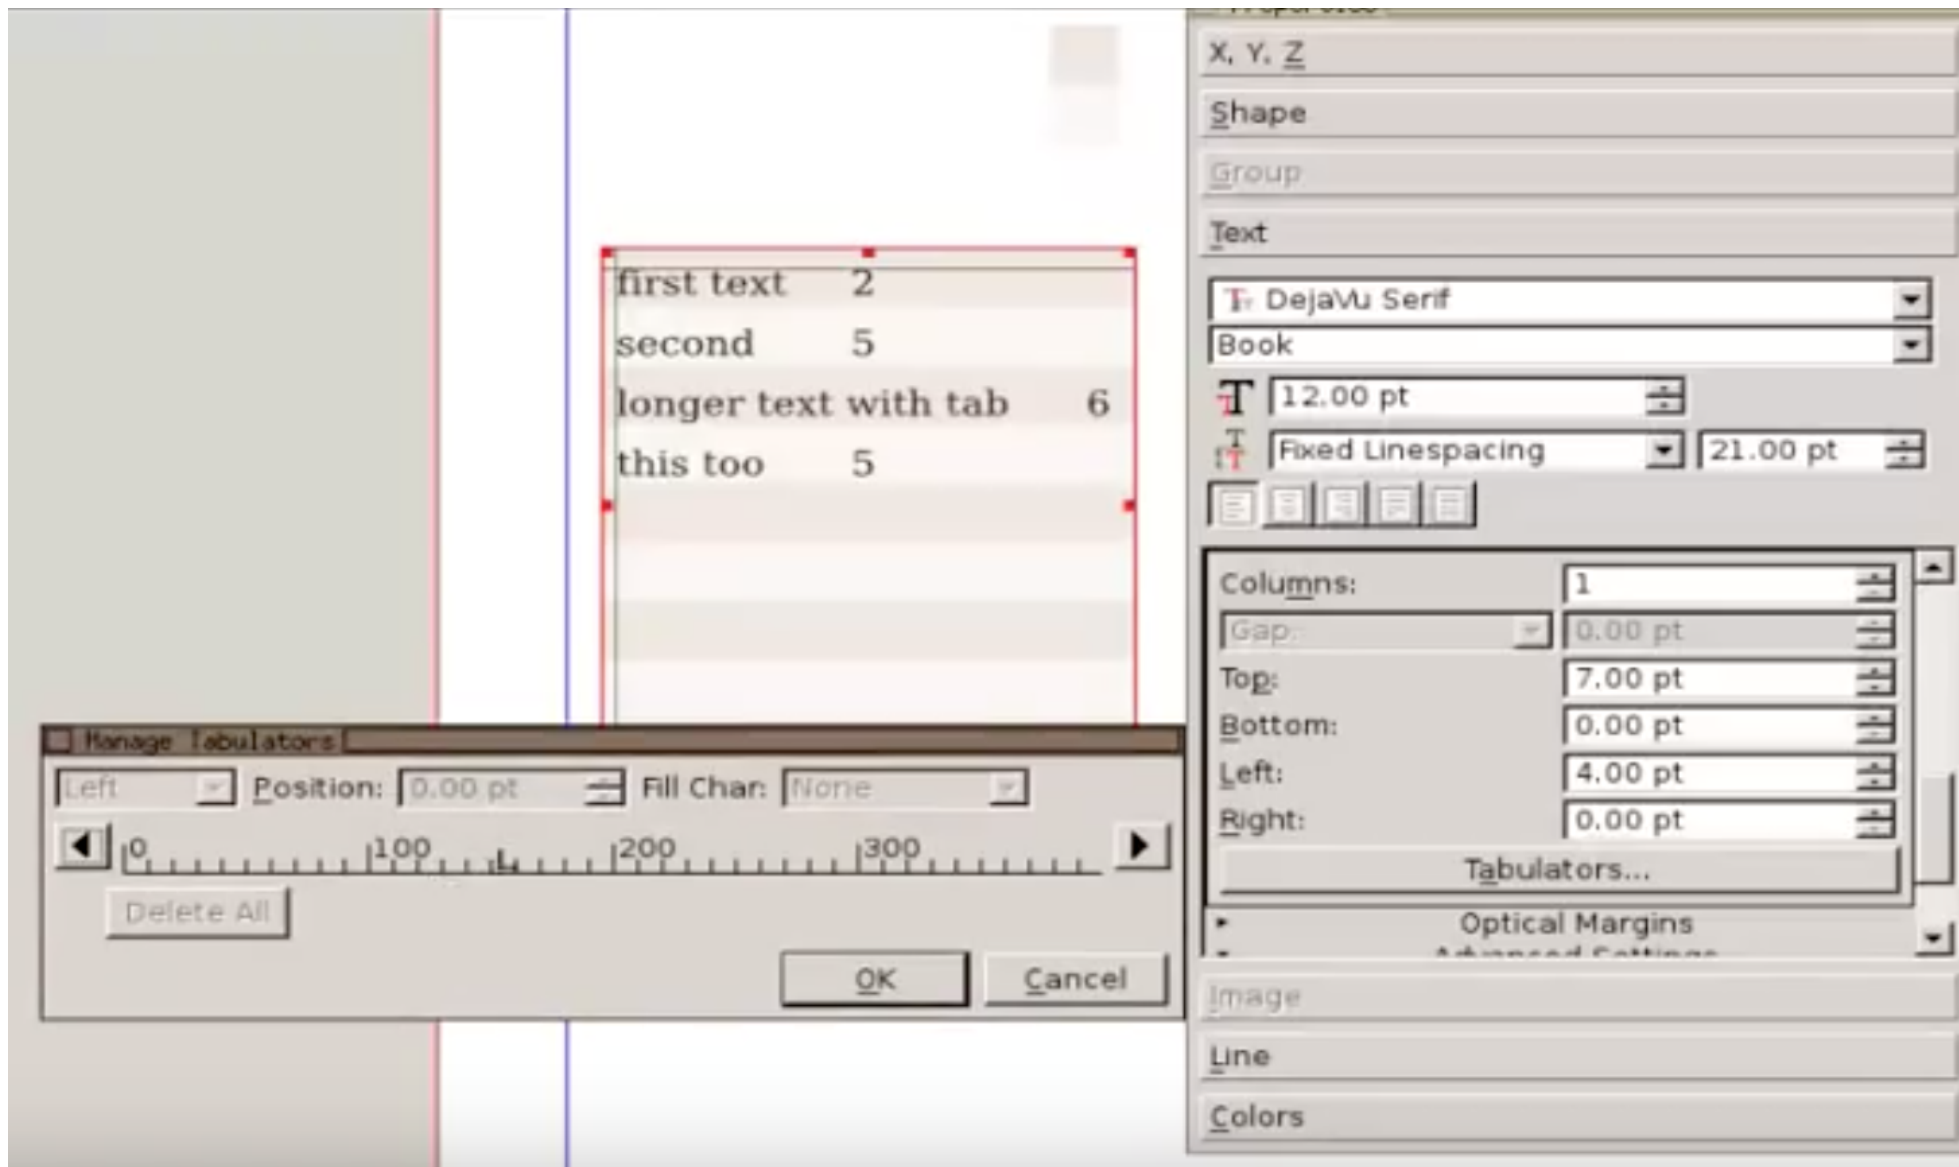

<https://youtu.be/V8LHozLpWa8>

The colorAnd with that you want your alternating rows to be.

Create a text box and set the pattern that you just createdAs its background.

Create a text "style" that fits your new background and then delimit each column with tabs. Then when you set the tab-stop or Tabulators as they're called Scribus will create a column like the effect over the background making it look like a table.
